

# Risk and liability declaration

Please read carefully and fill in all fields before you sign

Persons and organizations involved in the training:  
(„ProTec Instructor“)

Organization („ProTec“)

ProTec (Alpha ITC GmbH)

---

Dive Centre

---

Instructor / Dive Trainer

## Declaration on the business and contractual relationship

I understand and agree that the aforementioned ProTec instructors associated with the program I am participating in are licensed to use ProTec brands or to conduct ProTec training courses, but not agents, employees or franchisees from ProTec or its affiliated companies. I understand that ProTec instructors conduct their business independently and at their own risk. I understand that ProTec sets the standards for the ProTec diving training programs, but is not responsible for the operation of the business activities of the ProTec diving instructors, nor for the daily implementation of the ProTec programs and the monitoring of the divers by the ProTec diving instructors or their associated employees nor does it have the right to control them.

## Risk and liability declaration

With this explanation you will be informed about the risks of snorkeling and diving. The declaration also lists the circumstances under which you participate in the diving program at your own risk.

Your signature on this form is required to prove that you have received, read and understood the information contained therein. It is important that you read the contents of this Risk and Liability Statement before signing it. If there is any point in this statement that you do not understand, please discuss it with your instructor. If you are a minor, this form must also be signed by a parent or legal guardian.

### Note:

Snorkeling and diving carry risks that can result in death or serious injury. Diving with compressed air has certain risks. Decompression sickness, embolism, or other pressure-related injuries may occur that require treatment in a hyperbaric chamber. Open water dives required for training and certification can be performed in a location that is either temporally, spatially, or both removed from such a pressure chamber. Snorkeling and scuba diving are physically demanding activities and you will make an effort while diving. You must truthfully and fully inform the instructors and the facility through which this program is offered of your medical history.

## Disclaimer of liability

I understand and agree that neither the ProTec instructors conducting this program, nor ProTec or their affiliates, nor their employees, officers, agents, contractors or agents are responsible for any death, injury or other loss I suffered have. This applies insofar as they can be traced back to my own behavior or a matter or condition under my control that equates to my own cooperative negligence.

If there is no negligence or breach of duty, neither on the part of the ProTec diving instructors who run this program, nor on the part of ProTec and all of the above approved parties, then my participation in this diving program is entirely at my own risk.

I AM FULLY INFORMED ABOUT THE CONTENT OF THIS DISCLAIMER. READ ALL CAREFULLY BEFORE SIGNING.
